Enjoy the app! I'm just confused as to what "ghost followers" means...? Dear user;Ghost followers are inactive or fake Instagram accounts that may follow you, contributing to your overall follower count. However, they never interact with your content. Sometimes these accounts are created by real people who simply don't use their account.You can write to us when you need any support.Thank you very much for using our product.Mike There are way better apps that actually work and cost way less. Save your money---don't pay for this trash!! The app shows a list of suggestions as you type your IG name, but it shows random accounts only kinda related. It doesn't show my account as an option even though I typed it correctly dozens of times, so I literally can't use this app at all. Useless. A year later...the developer responds and tells me "not all accounts are searchable" and try closing and reopening the app. Umm...already did that AND there's no reason my personal account shouldn't be searchable. Again: this app is useless garbage and extremely overpriced. Dear user;Thanks for your feedback! We are so sorry for the bad experience. Not all accounts are searchable but please try again after fully closing the app and opening again. We will continue to optimize our features to bring you a better experience. Mike I know the App works it worked before. But I have had a paid account since last month and it will not let me access like normal I have to watch commercials and even then it forwards me to download something else this is crazy what is going on The developer, Brandia, Inc., indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The following data may be collected but it is not linked to your identity: Privacy practices may vary, for example, based on the features you use or your age.
